

# LED Work Lights - Polar Series

Grizzly POLAR is a compact and yet, powerful LED worklight (1,050 Lumens). It is thin in configuration for easy storage (ideal for emergency kit). Rated at IP65, it is highly water resistant (if you are looking at dipping the worklight in the water, then, you should be looking at IP68).

It comprises of 4,400mAh Lithium Ion high performance battery which gives you ample juice to charge your smartphone and other equipment that's accessible to a USB charger. Grizzly POLAR has an "in" and "out" charger, meaning that you can also use your USB friendly equipment to charge the worklight too, even though you will be provided with a plug in charger anyway. Grizzly POLAR's light can be used at full capacity and 50% capacity, which gives you a longer battery life.

Grizzly POLAR also has some extra amazing features, for example, if you happen to be changing your tyre on the side of the road, there is an option to change it to flash mode so that you can be seen in darkness. Or, if you find yourself trapped in a compromising situation, fear no more as it also has a SOS function to seek help. Grizzly POLAR's stand is magnetic and it is ideal for engineers that work on steel surfaces. Grizzly POLAR is compact but it carries a punch. It might be your best investment yet! ## TECHNICAL DATA SHEET

SPECIFICATION		
Model No	WLCL10W	WLCL20W
Image		
Wattage (W)	10	20
IP Rating	65	65
Input Voltage	AC 175-265V	AC/DC charger (5V,1A)
Lumens	1050	2200
Charging Time	4 hours-5 hours	5.5-6.5H (input 5V ,1A)
Discharging Time	-	3 hours (full power)
Dimming (brightness)	100%   50%   SOS   Flashing	100%   50%   SOS   Flashing
Safety Features	Charging, Discharging & High Temp Protection	Charging, Discharging & High Temp Protection
Battery	3.7V – 4,400mAh	3.7V – 6,600mAh
Lifespan	30,000 hours	30,000 hours
Weight	445g	445g

COB\* stands for Chip-On-Board.

CCT\* stands for Colour Temperature (measured in Kelvin).
